

## Job Description

Aviatrix Aero Labs, Namakkal, invites passionate and talented students to join our structured internship program across multiple technology and creative domains.

This program is designed to provide hands-on project experience, industry mentorship, and real-time exposure to drone technology, simulation systems, and digital media.

The internship program consists of a 9-month paid internship, during which interns will work on live projects, develop industry-relevant skills, and gain practical experience under expert guidance.

Based on performance, learning progress, and project contributions, candidates will be considered for permanent employment upon successful completion of the program.

### 1.Backend developer

#### Responsibilities:

- Develop and maintain backend services, APIs, and server-side applications.
- Design, implement, and optimize database schemas and queries.
- Collaborate with frontend developers to integrate user-facing elements with backend logic.
- Assist in debugging, testing, and improving application performance and scalability.
- Support deployment, monitoring, and maintenance of cloud-based applications.

#### Skills Required:

- Knowledge of Python, Java, Node.js or similar backend programming languages.
- Experience with databases such as MySQL, PostgreSQL, MongoDB, or Redis.
- Understanding of RESTful APIs, microservices, and backend architecture.
- Familiarity with Git, Linux, and cloud platforms (AWS, Azure, or GCP) is preferred.
- Basic understanding of security, authentication, and software development best practices.

## 2.Mobile App Developer

### Responsibilities:

- Develop and maintain mobile applications for Android and/or iOS platforms.
- Implement user interfaces and application features based on design specifications.
- Integrate APIs, databases, and third-party services into mobile applications.
- Assist in testing, debugging, and optimizing app performance and usability.
- Collaborate with designers and backend developers to deliver seamless user experiences.

### Skills Required:

- Knowledge of mobile app development using Flutter, React Native, Kotlin, Swift, or Java.
- Understanding of mobile UI/UX principles and responsive design.
- Experience with REST APIs, JSON, and mobile application architecture.
- Familiarity with Git, Firebase, and mobile app deployment processes is preferred.
- Basic understanding of state management, debugging, and performance optimization.

## 3.PCB Designer:

### Responsibilities:

- Design and develop PCB layouts for electronic and embedded systems projects.
- Create schematics, component libraries, and PCB footprints using EDA tools.
- Collaborate with hardware and embedded engineers to ensure proper circuit implementation.
- Perform design verification, troubleshooting, and optimization for manufacturability.
- Assist in prototype assembly, testing, and documentation of PCB designs.

### Skills Required:

- Knowledge of PCB design tools such as Altium Designer, KiCad, Eagle, or EasyEDA.
- Understanding of electronic circuits, schematic design, and component selection.
- Familiarity with PCB layout principles, signal integrity, and EMI/EMC considerations.
- Experience with microcontrollers, sensors, and communication interfaces is preferred.
- Basic understanding of PCB fabrication, assembly processes, and hardware debugging.

### **3.Embedded Engineer:**

#### **Responsibilities:**

- Develop and test embedded systems for automation, IoT, and hardware-based projects.
- Work with microcontrollers, sensors, communication modules, and peripheral devices.
- Assist in firmware development, debugging, and hardware-software integration.
- Design, implement, and optimize embedded applications for performance and reliability.
- Support prototype development, validation, and system troubleshooting.

#### **Skills Required:**

- Knowledge of C/C++, Embedded C, or Python for embedded system development.
- Experience with microcontrollers such as Arduino, STM32, ESP32, PIC, or Raspberry Pi.
- Understanding of embedded systems, real-time programming, and hardware interfaces.
- Familiarity with communication protocols such as UART, SPI, I2C, CAN, or MQTT.
- Basic knowledge of circuit design, debugging tools, and IoT technologies is preferred.

### **4.Sales Marketing:**

#### **Responsibilities:**

- Assist in planning and executing sales and marketing campaigns.
- Generate leads and build relationships with potential customers.
- Conduct market research to identify trends and opportunities.
- Support content creation for social media and promotions.
- Monitor campaign performance and prepare basic reports.

#### **Skills Required:**

- Strong communication, presentation, and interpersonal skills.
- Basic understanding of sales processes, digital marketing, and market research techniques.
- Familiarity with social media platforms, content creation, and marketing tools.
- Ability to analyze data, identify trends, and contribute to strategic decisions.
- Self-motivated, result-oriented, and capable of working effectively in a team environment.

## **5.Game Developer:**

### **Responsibilities:**

- Develop and implement game features, mechanics, and interactive elements.
- Collaborate with designers and artists to create engaging gameplay experiences.
- Debug, test, and optimize game performance across platforms.
- Integrate assets, animations, and user interface components into games.
- Assist in maintaining and improving existing game projects.

### **Skills Required:**

- Knowledge of game development using Unity, Unreal Engine, or similar platforms.
- Proficiency in C#, C++, or other game programming languages.
- Understanding of game design principles and development workflows.
- Familiarity with physics, animations, and game optimization techniques.
- Ability to work collaboratively in a creative development environment.

## **6.Tele Calling:**

### **Responsibilities:**

- Make outbound calls to prospective and existing customers to promote products or services.
- Handle inbound customer inquiries and provide accurate information in a professional manner.
- Follow up with leads, schedule appointments, and maintain customer relationships.
- Maintain accurate records of customer interactions and update CRM systems regularly.
- Achieve daily, weekly, and monthly calling and sales targets.
- Resolve customer concerns or escalate issues to the appropriate department when required.

### **Skills Required:**

- Excellent verbal communication and interpersonal skills.
- Strong persuasion and negotiation abilities.
- Basic computer knowledge and familiarity with CRM software.
- Ability to handle customer objections and resolve queries effectively.
- Good time management and organizational skills.
- Ability to work independently and as part of a team in a target-driven environment.
